HIDRATA

Esta temporada analiza qué tan pesado es tu hidratante corporal y facial. A veces en las estaciones frías tendemos a usar cremas más intensas que pueden resultar pesadas para los días de calor. Adapta tus productos de uso diario para no saturar tu piel con cosas que tal vez no requiere, pero nunca te olvides de hidratar. Cambia tu crema humectante por una a base de agua o con una fórmula extraliviana para que se sienta ligera en tu piel y evites sensaciones grasosas.

PROTÉGETE

Es muy importante proteger nuestra piel del sol para evitar el envejecimiento prematuro y las enfermedades dermatológicas. Aunque esta es tarea de todos los días, durante el verano resalta todavía más importante usar un buen protector solar. Aplica tu bloqueador con un factor solar de mínimo 30 media hora antes de salir directo a los rayos UV para garantizar que se fije y que realmente estarás protegida estando al aire libre.
